Please note that this extension is provided as is. It is recommended to always backup your installation prior to use.

CoScale Performance & Business monitoring

CoScale offers:

- Detailed performance insights and context-aware event annotations, i.e. related to Module updates, cache flushing, etc.
- Correlate performance with business metrics like # orders, average order value, revenue, etc.
- Full-stack performance monitoring, including databases, caching, web servers, etc.
- Smart analytics including anomaly detection for automatically detecting problems with your shop
- Connect with other 3rd-party software like Google Analytics, Pingdom, Mailchimp, Campaignmonitor and many more...

The screenshot shows the homepage of SupportDesk. At the top, there is a logo featuring a red hexagon with a white cross inside, followed by the text "SupportDesk" in bold black and orange letters, and "Support voor Magento en Joomla!" in a smaller orange font. Below the logo is a cartoon character of a person in an orange jumpsuit and yellow hard hat holding a large wrench. To the right of the character is a list of services offered, each preceded by a green checkmark. The services include: Performance optimalisatie, Theming, templating, Maatwerk training, SEO, SEM, SEA, Consultancy, Upgrade, Migratie, Security, Hosting, Mobile, and APK. At the bottom, there is a call-to-action: "Meer weten? www.supportdesk.nu Of bel 020-337 5961".
